DETAILED ACTION***Drawings***

1. The drawings are objected to because in figure 1a, the lead line for reference numeral "12" appears to point to the fender when it should point to the door. Also, in figure 5A, the reference numeral "50" should be changed to --56--. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3612

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Nishikawa et al.

Re claim 9, Nishikawa et al. discloses a vehicle door module comprising a door panel (P) comprising a window guide (R2) that defines an axis, a latch bracket (see figure 10) attached to the door panel, the latch bracket extending perpendicularly to the axis and comprising a latch bracket cable holder (73) and a door latch (33) attached to the latch bracket.

Allowable Subject Matter

4. Claims 1-8 and 13-17 are allowed.
5. Claims 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kobayashi et al., Staser et al., Okamoto et al., Manuel et al., Slmonowicz et al., and Spurr disclose vehicle door features.
